

MULTISECTOR PLAN
for **AGING**

Funders Community

An Initiative of

**GRANTMAKERS
IN AGING**

Multisector Plans for Aging serve as blueprints for action on aging across sectors and government agencies. Plans help to break down administrative and operational silos, mobilize and align a wide array of funding sources, and track the impact of a coordinated effort to improve wellbeing in later life. More than half of states are currently working on Multisector Plans.

The Multisector Plans for Aging Funders Community, launched in 2022, provides a forum for funders who are exploring, initiating, or implementing state, regional, or local Multisector Plans on Aging to share information, strategies, and solutions.

This Funders Community is open to all GIA members. Learn more about Multisector Plans at <https://multisectorplanforaging.org>.

Interested in participating?
